## NEW ECHOLINK NODE

*ON THE AIR! (SOON)*

### WB7HAM

Darin

We are very close to having our Echolink station back on the air. We have scaled back our ambitious plans for a 3 or 4 band node. We are now concentrating on a single band simplex node, probably in the 220 band, with a 440 control link. As always, stay tuned for updates.

## REPEATER & SIMPLEX UPDATE

*144, 440 & 220 USE*

### WB7HAM

Darin

More than a year ago the 444.100+ repeater was sold. Since that time we have been using simplex frequencies in the 144, 440 & 220 MHz bands. However many factors have kept us off the air. We don't feel we need to go into them here, except to tell you that the main factor had involved moving to a new location. Stay tuned here for updates.

## NEW CLUB CALLSIGN?

*NEW CLUB CALL SIGN CONSIDERED*

### WB7HAM

Darin

The club is considering changing its call sign to better reflect our new direction. If this happens we will post the new call here. Stay tuned!!!!
